VENKATARAMANA CHINTHAKAYALA

JAVA DEVELOPER | JAVA | SPRING BOOT | REST APIs | MICROSERVICES

Hyderabad, Telangana, India | +91 9100802854 | ramanavenkata7243@gmail.com

PROFESSIONAL SUMMARY

Java Developer with 3+ years of experience developing backend applications and RESTful APIs using Java, Spring Boot, Spring MVC, Hibernate/JPA, and MySQL. Experienced in POS and e-commerce application development, including product, inventory, order processing, authentication, and notification modules. Hands-on experience with Spring Security, JWT, Redis caching, AWS EC2/S3, Firebase integrations, and third-party APIs. Improved API response times by up to 30% through caching and database query optimization. Available for immediate joining.

TECHNICAL SKILLS

Programming: Java 8+, Java 17, OOP, Collections Framework, Stream API

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, RESTful APIs, Microservices

Security: JWT, Authentication, Authorization, Role-Based Access Control (RBAC), Firebase OAuth

Databases: MySQL, SQL, Database Design, Query Optimization, Performance Tuning

Caching & Messaging: Redis, Elasticsearch, Apache Kafka

Cloud & Integrations: AWS EC2, S3, SQS, RDS, CloudWatch, Firebase Cloud Messaging (FCM), FreeMarker, WhatsApp API, Third-Party APIs

Build, DevOps & Tools: Git, GitHub, Maven, Gradle, Docker, Jenkins, Kubernetes, Taiga

Testing & Methodologies: JUnit, Mockito, API Testing, Apache JMeter, JaCoCo, SonarQube, Debugging, Agile, SDLC

PROFESSIONAL EXPERIENCE

Java Backend Developer | Quickclick Infocom Private Limited

September 2023 – Present

- Developed and maintained RESTful APIs using Java, Spring Boot, Spring MVC, Hibernate, JPA, and MySQL for POS and e-commerce applications.
- Implemented backend modules for product management, inventory management, order processing, authentication, notifications, and media storage.
- Implemented secure authentication and role-based authorization using Spring Security and JWT to protect REST API endpoints.
- Integrated Firebase Authentication for Google and Facebook login, Firebase Cloud Messaging (FCM), email notifications using FreeMarker templates, and third-party APIs.
- Implemented Redis caching for frequently accessed data and optimized MySQL queries, improving API response times by up to 30%.
- Integrated AWS S3 for product images and media storage and deployed backend services on AWS EC2.
- Performed API testing, debugging, troubleshooting, and production issue resolution to improve application reliability.
- Worked with cross-functional development and QA teams on API integration, testing, and defect resolution using Agile practices.

PROJECTS

LOCCA e-Commerce Application | 2025 – Present

Technologies: Java 8+, Spring Boot, REST APIs, MySQL, Spring Security, Firebase OAuth, FCM, Redis, AWS S3

- Developed backend modules for product, inventory, and order management using Java and Spring Boot.
- Designed and implemented REST APIs to support e-commerce business operations.
- Integrated Firebase Authentication for Google and Facebook login and FCM for order updates and promotional notifications.
- Used Redis caching to improve response times for frequently accessed data and integrated AWS S3 for product image and media storage.

Mobile-Based Offline POS System | 2023 – 2025

Technologies: Java, Spring Boot, REST APIs, Hibernate, JPA, MySQL, Spring Security, JWT, Redis, AWS S3, FCM

- Developed backend APIs for product, inventory, and POS transaction processing.
- Implemented JWT authentication and role-based authorization using Spring Security.
- Developed barcode-based self-checkout functionality and inventory synchronization across multiple devices.
- Integrated WhatsApp API for digital receipts and order confirmations, along with FCM and email notifications for transaction updates and low-stock alerts.
- Used Redis caching and AWS S3 to support application performance and media storage.

EDUCATION

Bachelor of Science (B.Sc.) | June 2021 – June 2023

Sri Vaishnavi Degree College, Rajampet | Yogi Vemana University, Kadapa
